

SURGICAL AUTHORIZATION

OWNER'S NAME _____
PET'S NAME _____ BREED _____ SEX _____

Because no surgery is without some risk, however, small, it is advisable to perform a pre-surgical/anesthesia blood screen. Knowing how certain body organs, such as the liver and kidneys, are functioning is important prior to anesthesia. These organs are responsible for eliminating anesthetic agents from the body and a blood screen is the best method for assessing their health. The CBC (complete blood count) is useful in identifying white and red blood cell abnormalities that may reveal anemia, infections, etc.

Our hospital laboratory is equipped to perform the necessary blood screen, and results are available to the doctor before surgery. We offer the organ function screening for \$107.50 and the CBC for \$51.50. If any abnormalities exist, the doctor will either contact you before proceeding, or take steps necessary to help ensure the safe return of your pet.

I hereby authorize performance of the following surgical procedures.

The nature of such service has been described to me to my satisfaction and I realize that no guarantee nor warranty can ethically or professionally be made regarding the results or cure.

I understand that I assume financial responsibility for all services rendered and that payment is due on the date of surgery.

BLOOD SCREENING

- CBC (complete blood count)
 YES, I want my pet to receive a CBC
